

DIPLOMA IN SOCIAL SERVICE

Social Policy Implementation

SSC-POL-4005-1.1

Reflective Practice

Assignment Cover Sheet

Name of Candidate TAN VIE MING JOHN	Host Organisation SLEC @Bukit Timsh
Name of Assessor Dr Kan	Contact Details
Name of IA Supervisor	Date of Submission
CANDIDATE'S DECLARATION a. I, hereby declare that all the entries in this journal are my own effort and do not involve plagiarism or works of other people whose services I have engaged. b. I have not allowed and will not allow anyone to copy any of my Written Assignments with the intention of passing it off as his/her own works. Signature: _____ Date: _____ <i>*Attach this Assignment Cover sheet to your RP journal.</i>	

Introduction to Reflective Practice Assignment

A reflective journal is a personal record of your learning experiences. It is a tool which enables you to record and reflect upon your observations and responses to situations, which can then be used later to explore and analyse ways of thinking and being in contexts. Journals, although generally written, can also contain images, drawings and other types of reference materials.

This Reflective Journal uses the basic framework for self-reflection which is *description, reflect and application*. For this Reflective Practice assignment, you are required to complete this reflective journal of experiences gathered during the industrial attachment.

Instructions

Pre-Attachment

1. You will be assigned to a Host Organisation (HO) for your industrial attachment (IA). A HO supervisor will be appointed to mentor you.
2. If you have any questions regarding the entries in the RPJ, email your assessor for clarifications.
3. HMTA office will contact you to book the date for the Final Assessment before the IA. The date and timeslot selected by you is final. Any changes may incur an administrative fee.

During Attachment

4. A week prior to your IA, craft some guiding questions related to the TSC listed in the journal. You may gather in groups of 2 or 3 to design the questions. These questions will help you to target the areas you would like to learn during the attachment.
5. Preferable to make an appointment with your IA-Supervisor within the first week of attachment to gather the information related to the TSC. In addition, reflect on your work roles (if any) performed each workday which are related to any of the TSC in the RP journal.
6. Document the information gathered from your IA-supervisor, your personal observations or the work roles you performed every day in Column 2 of the RPJ

for the respective modules.

7. The writing of the RPJ is an individual and personal assignment.

8. The RPJ should be used to explore situations from a personal perspective, but generally within the context of learning from your experiences. Write your personal reflections in Column 3 on the information gathered in Column 2 of the RPJ. To guide you in writing your entry, you may find the following sample questions useful:

- *Is there a framework?*
(a) If no, why not? What would you have recommended to the HO?
(b) If yes, does it serve its intended purpose? Is there a set of principles to guide the organisation in managing the framework? What would you have recommended to the HO?
- *What were the incidents? What were the outcomes? Were these incidents preventable? If yes, what could be done differently to prevent the incidents?*

9. You are advised to make your entries after each workday and at your own pace.

Post-Attachment

10. Email the RPJ to your assessor **5 days after the end of the industrial attachment** and **cc to the Course Co-ordinator**.

During RP Presentation

11. You have 30 mins to present your entries for each module to the assessor. The following sequence is recommended:

- Provide a brief overview of the information gathered.
- Share your thoughts and feelings on what you have learnt.
- Highlight your key learning points from your experience.

12. Assessor may pose a few questions to clarify your entries.

13. You must demonstrate competency in both the RPJ and the RP presentation, in order to be deemed competent for this RP.

Quality of the Journal Entries

Entries should:

- be clear and reflect your ability to think critically and objectively.
- be in complete sentences. You are allowed to number or bullet your entries for easy reading.
- demonstrate you have acquired the respective technical skills and competencies of this module.
- journal all interactions, experiences, thoughts and relevant information which are deemed relevant
- not breach client confidentiality
- avoid using names when referring to people at the workplace

Social Policy Implementation (SSC-POL-4005-1.1)

Learning Outcomes & Technical Skills and Competencies	Design 2 guiding Questions per row	Summarise the Information	Reflect on the information and pen your observations, thoughts, and experiences in relation to the respective LOs and TSC.
LO1 Develop a realistic and feasible Social Policy Implementation Plan to achieve the goals and objectives of the social policy. TSC A1 Establish social policy implementation plans			
LO2 Learners will be able to collaborate with the Implementation team to execute the Social Policy Implementation			

Learning Outcomes & Technical Skills and Competencies	Design 2 guiding Questions per row	Summarise the Information	Reflect on the information and pen your observations, thoughts, and experiences in relation to the respective LOs and TSC.
Plan successfully to achieve its objectives. TSC A7 Collaborate with implementation team to ensure that the implementation plans are realistic and feasible			
LO3 Learners will be able to assess the impacts of social policy implementation on client groups and formulate interventions and responses to mitigate the negative impacts and maximise the positive impacts.			

Learning Outcomes & Technical Skills and Competencies	Design 2 guiding Questions per row	Summarise the Information	Reflect on the information and pen your observations, thoughts, and experiences in relation to the respective LOs and TSC.
TSC A2 Identify impact of policy implementation on client groups K5 Methods to collect feedback on social policies			

LO1 Develop a realistic and feasible Social Policy Implementation Plan to achieve the goals and objectives of the social policy.

TSC

A1 Establish social policy implementation plans

Guiding Questions:

Baking for Inter-generational Bonding - What are your center's objectives, goals, and resources (budget) for the pilot program?

How do you conduct program risk assessment to assess, manage risks and formulate response strategies?

Objectives (Purpose)

To enable and empower 3 seniors to mentor 6 youths-at-risk at professional baking skills in close collaboration with at-sunrise Global Chef Academy.

SMART Goal

Within **three months** (July - September 2026) over 12 Saturdays, equip **6 youths** with professional cake baking skills in blue berry muffins, pandan chiffon cake, and chocolate swiss roll through mentoring by **3 seniors** with prior professional experience in the Food & Beverage Industry.

Resources

Human Capital and Program Governance

1. Establish Project Task Force: Appoint a Project Manager (PM) and Project Executive (PE), supported by two Center staff and three volunteers, to oversee end-to-end service delivery.
2. Stakeholder Recruitment: Identify and onboard three senior mentors with professional F&B expertise and six youth beneficiaries with a demonstrated interest in culinary arts.
3. Capacity Building: Conduct a comprehensive pre-program briefing to align the team on roles, responsibilities, and specific intervention goals.
4. Volunteer Engagement: Recruit three volunteers: two volunteer photographers to document the program for the final exhibition and milestone reporting and one volunteer First Aider.

Curriculum Development, Facilities Management and Corporate Sponsorships

5. Pedagogical Partnership: Collaborate with the Global Chef Academy to adapt baking curricula and training materials, ensuring they are developmentally appropriate for youth and conducive to senior mentorship.
6. Facility Management: Secure kitchen facilities at the Senior Activity Centre, ensuring all equipment and workflows comply with Workplace Safety and Health

- (WSH) regulations. WSH Alignment: Ensure the kitchen facilities audit specifically includes Food Hygiene and Safety protocols alongside general workplace safety.
- Corporate Social Responsibility (CSR) Engagement: Formalize sponsorship agreements with NTUC and RedManShop for the provision of ingredients, tools, and professional pedagogical resources.

Monitoring, **Evaluation** and Learning (MEL)

- Formative Evaluation: Conduct weekly observations and feedback loops to assess intergenerational chemistry, pedagogical pacing, and participant engagement. (*Design Feedback form)
- Qualitative Assessment: Facilitate focus group discussions (FGDs) with both cohorts to capture lived experiences and identify areas for programmatic refinement.
- Quantitative Assessment: Survey questions using Likert scale that measure levels of skills attainment, pace of program delivery, and social confidence
- Summative Impact Analysis: Perform a comprehensive post-pilot analysis after three months to measure the program's impact on intergenerational bonding and youth-parent relationships.
- Continuous Quality Improvement (CQI): Collate feedback into a formal report for management and stakeholders to inform future program enhancements and scalability.

Risk Management - Assessment and Response Strategy

Types of Risks	Risk Level	Response Strategy
Cost Risk		
Cost of baking ingredients	Medium Risk	Provision additional budget to factor in costs inflation
Schedule Risk		
Youths or Seniors may fall sick or absent	Medium Risk	Wait list of youths and seniors who may have signed up after event registration closed
Quality Risk		

Physical limitations ("I am too old / in a wheelchair")	Low Risk	Ensure the teaching environment is fully accessible (ramps, elevators).
Food freezer break down	Low Risk	Center Manager standby freezer at home
Potential Failure of Teaching-young people will not have the patience to learn. While based on a current perception, the "risk" is the actual failure of the future teaching session	Medium Risk	To provide seniors with some teaching skill training and to help them to review their conduct of the teaching with the help of the Global Chef Academy and Manager.
Scope Risk Management may not support the question and question the success of the programme	Medium Risk	Present the program with clear goals that align with the organization's mission and vision. In addition, include feedback from all stakeholders and follow industry best practices to ensure success.

LO2 Learners will be able to collaborate with the Implementation team to execute the Social Policy Implementation Plan successfully to achieve its objectives.

TSC

A7 Collaborate with implementation team to ensure that the implementation plans are realistic and feasible

(Guiding Question:)

Describe the primary functions of the implementation team for Baking for Inter-generational Bonding

Ensure implementation is a success by defining **clear Roles and Responsibilities**. Formalize the organizational chart to designate specific tasks, providing a structured transparent framework to gauge team accountability and engagement levels.

Create feedback loop to provide a **specific channel for receiving clients' feedback** for continuous quality improvements. Weekly evaluation meetings to analyze feedback and implement near real-time refinements to the implementation plan.

Multi-Channel Community Outreach: Execute a dual-track publicity strategy using hyper-local physical banners and omni-channel digital engagement (Facebook, Instagram, TikTok, X) to drive public awareness for the inter-generational baking program. Create collaterals and print flyers for distribution in the neighborhood to extend outreach to wider audiences within the community.

Which community partners does your center work closely with for successful implementation of the program?

1. **Specialized Volunteer Engagement:** Onboard and train three specialized volunteers—comprising two for digital documentation/photography and one for medical first-aid support—to maintain safety and reporting standards.
2. **Recruit and Train Youths and Seniors:** Train the regular team and volunteers on how to effectively support seniors and youths to prepare them for the event
3. **Counselor Integration:** Partner with the counselor to identify which "at-risk" youths are best suited for the culinary program and provide them with pre-session briefings.
4. **Management Buy-in:** Present detailed program implementation plan including budget plan to management and key stakeholders for buy-in.

LO3 Learners will be able to assess the impacts of social policy implementation on client groups and formulate interventions and responses to mitigate the negative impacts and maximise the positive impacts.

A2 Identify the impact of policy implementation on client groups

(Guiding Question: **What are the positive impacts and negative impacts that your team will encounter during social policy implementation?**)

In Singapore, social policies span areas including social security, education, healthcare, and family support. These policies exert both positive and negative influences on different segments of the population.

Positive Impacts

Lower-income households and vulnerable groups

- **Financial Security:** Schemes such as ComCare provide direct financial aid for daily expenses, while Workfare tops up the income of lower-wage workers. Initiatives like the Family Empowerment Programme (FEP) further alleviate financial stress, enabling better planning and improved access to essential services.
- **Enhanced Accessibility:** Subsidies and priority arrangements ensure that children from low-income families can attend quality preschools. Similarly, means-tested

and enhanced healthcare subsidies make medical treatment more affordable, with significant expansions expected to benefit over a million residents from late 2024 onwards.

- **Social Mobility:** Programmes like ComLink+ offer personalised coaching to help families set goals, access coordinated support, and utilise incentives for education, employment, and housing, ultimately fostering self-reliance.

Seniors

- **Care Protection:** CareShield Life provides universal coverage for severe disability, offering lifelong payouts to defray care costs regardless of an individual's health history.

Students

- **Holistic Growth:** Changes to the education system, such as revised scoring and entry requirements, aim to reduce academic stress and support well-being. Improved support for students with special educational needs (SEN) also ensures better access to quality education and smoother transitions into adulthood.

Potential Negative Impacts

- **Accessibility Barriers:** Complex application procedures or strict qualifying criteria may hinder access for some eligible groups. For instance, older cohorts eligible for optional schemes may face difficulties understanding enrolment processes or lack awareness of available benefits.
- **Disparities in Impact:** Despite inclusive intentions, outcomes may vary across groups. Some households may still face financial strain due to living costs, and levels of awareness and access to services can differ among communities.
- **Adaptation Challenges:** Policy revisions may require individuals and families to adjust to new rules or changes in support levels, potentially causing uncertainty or transitional difficulties.

K5 Methods to collect feedback on social policies

(Guiding Question: **What are the methods your team used to collecting feedback on social policies?**)

Singapore employs a multi-channel approach to gather public input, ensuring policies remain relevant and responsive to societal needs.

Digital Platforms

- **CrowdTaskSG:** A portal allowing citizens to contribute views via surveys and polls. It offers secure login, incentives for participation, and customised tasks based on user profiles.
- **REACH:** The government's main outreach arm utilises social media, messaging apps, and online surveys. It also partners with commercial platforms to conduct "e-Listening Points" and reach a broader audience.

Physical and Community Engagement

- **Listening Points:** Face-to-face sessions are held at community clubs, workplaces, and public spaces. These include informal discussions with residents and focused dialogues with specific groups such as professionals or ethnic communities.
- **Forums and Dialogues:** Agencies organise public consultations, webinars, and focus groups. National exercises like Forward SG and pre-Budget discussions provide platforms for citizens to shape major policy directions.

Surveys and Research

- **Official Studies:** Government ministries commission comprehensive surveys to measure public sentiment and track social trends, typically conducted via interviews or telephone polls.
 - **Independent Analysis:** Academic institutions and research bodies also conduct studies, offering additional data and perspectives that inform policy refinement.
-
